

# QWeb Designs

## Affordable Web Solutions

This demo sheet shows how easy it is to make changes to your own web site (or database) without knowing HTML or any other kind of web site design requirements. All you need is a computer with an internet connection to make changes from anywhere around the world. You can even make changes using different computers because there is no software program required for updates.

Clients who purchase database-driven sites that they can update will receive a user name and password that they will use to login and make changes. Changes can be made to all areas on the site displayed below. We only included screenshots of a few available changes here. Please call us at 502-298-2802 if you have any questions.
